Natural Gas Supply/Demand Notice of Inquiry  
-----

Sender Name: Lloyd Weaver

Company/Organization: LEW Holdings LLC  
-----

GP = gasification plant

GT = gasification technology

NG = natural gas

FT = Fischer-Tropsch process

Things to do to solve the NG crisis, through tax policies:

1. Aggressively pursue GP coupled to FT with coal, garbage and other available carbon resources to make pipeline quality methane on a mass scale
2. Establish GP next to large industrial NG users, even NG power plants where feasible to take them off existing NG lines
3. Implement strong and permanent NG conservation programs
4. Establish more NG import facilities
5. Provide more GT choices by developing different and better GT, everybody needs better GT; cheaper, simpler, more reliable, dry-feed; at a minimum these need to be GT watchwords
