

**RESOLUTION
SUPPORTING
FREEPORT LNG'S PROPOSED LIQUEFACTION AND EXPORT PROJECT**

At a regular meeting of the Executive Committee of the Brazosport Area Chamber of Commerce, held at the Chamber office, 300 Abner Jackson Parkway, Lake Jackson, Texas on December 6, 2010, among other business came to be considered the following resolution, upon which a motion duly was made and seconded, adopted by vote of all Executive Board members:

FINDINGS

1. Whereas, Freeport LNG Development, L.P. ("Freeport LNG") and its subsidiary FLNG Land, Inc. ("Freeport LNG") owns and operates a liquefied natural gas ("LNG") import, storage and regasification terminal on land leased from Port Freeport on Quintana Island, and
2. Whereas, Freeport LNG is now proposing to permit, construct and operate LNG liquefaction, storage and export facilities on the same land currently leased from Port Freeport, which if fully built are estimated to cost more than \$2,000,000,000, and
3. Whereas, the proposed facilities would bring much-needed employment to the Brazosport Area and Brazoria County, including more than 1,000 construction jobs over two to three years and 20-30 permanent fulltime jobs to operate and manage the facilities, and
4. Whereas, the proposed facilities would bring increased economic activity to the Brazosport Area and Brazoria County, including expenditures on local goods and services, and
5. Whereas, the proposed facilities would bring significantly increased LNG vessel traffic to Port Freeport, benefiting a wide range of maritime interests, and
6. Whereas, the proposed facilities would bring significantly increased taxes, tariffs and fees to Port Freeport, the Town of Quintana, the Brazosport Area and other Brazoria County jurisdictions, and
7. Whereas, Freeport LNG has been an active and valued member of the Brazoria County community over the past decade, consistently demonstrating a strong corporate commitment to safety, environmental stewardship and civic engagement.

NOW, THEREFORE BE IT RESOLVED by the Executive Board of Directors of the Brazosport Area Chamber of Commerce that the Chamber strongly urges the U.S. Department of Energy, the Federal Energy Regulatory Commission and any other involved federal, state and local government agencies to promptly consider and process any government approvals required to enable the construction and operation of Freeport LNG's proposed LNG liquefaction and export facilities.

Vicki Melass, 2010 Chairman of the Board
