Re:Gulf Coast LNG Export, LLC - Application for Long-Term Authorization to Export Domestically Produced Liquefied Natural Gas for a 25-Year Period FE Docket No. 12-05-LNG

Dear Mr. Anderson,

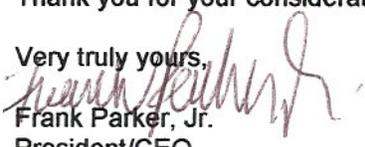

I am writing on behalf of Parker & Company in support of Gulf Coast LNG Export, LLC's application for long-term authorization to export domestically produced liquefied natural gas (LNG). Our company has various customers that use the port the additional revenue from the shipping activity for this project will help the fee revenue for the port thus helping keep fees lower to our customers.

As you are aware, Gulf Coast LNG is proposing a significant new investment to construct facilities in Brownsville, Texas that would allow for the receipt and liquefaction of natural gas and the export of LNG. We support the Gulf Coast LNG project because of the significant job creation and positive economic impact it will have to our community. Brownsville, Texas has a large population looking for good paying permanent jobs. The Gulf Coast LNG project will help the Brownsville community by supplying thousands of jobs, increasing the local tax base and improving the standard of living.

We all know just by the price of Natural Gas that the US has a plentiful supply, many wells are shut in as there is no market for the surplus gas. Providing another market will stimulate other activities for production of natural gas. Also the plant will provide jobs to our area our unemployment rate is currently around 12%, 4% over the national average.

Thank you for your consideration

Very truly yours,

Frank Parker, Jr.

President/CEO
