Subject: Proposed Permits to Allow more exporting of LNG

Please consider all the additional hydraulic fracturing that industry will incur upon the unfortunate citizens (myself included) who live above the Marcellus shale areas. Our lifestyles have already been seriously degraded. My own Pine Creek Valley in north central PA had been a vacation paradise for hunters, fly fishermen, kayakers, bicyclists and joggers (the 62-mile-long Pine Creek Rail Trail), and a wonderful place to live. Now that has all been altered—incessant truck traffic on two-lane Route 44/414, with all the accompanying diesel pollution, acres and acres of woodland lost to gas pads and access roads and pipelines. Please help limit this insanity by denying exportation, which would lead to more drilling.

David Ira Kagan
